**MID-STATES MATERIAL
HANDLING AND FABRICATION
7.3.19
2019 Q3**

Nevada, IA

Half of the year has already gone by!

In Quarter 2, Mid-States has rolled out multiple new product lines. Mid-States is now manufacturing valves, deadheads, and other smaller grain accessory components. Furthermore, the company has officially added Bucket Elevators to their product line. With a heavy duty and “millwright minded” design, Mid-States’ Bucket Elevators will offer the best to their customers and end users.

Mid-States is also excited to announce they will be expanding their operations into another building. This building will be filled with more work centers, machines, and a paint booth to help better serve their customers. This expansion will help Mid-States improve lead times, improve efficiency, and ensure quality.

We look forward to serving you! For more information call us at 515-382-1225 or email us at sales@mmfiowa.com.

**OUR MISSION: ANTICIPATING, RECOGNIZING, AND EXCEEDING CUSTOMER
